## Things to Know and Do!

The weather turns fast so KEYS MUST BE AVAILABLE to our staff and any combos required for access  
Before you leave your boat for the winter

- Ensure any holding tanks and water tanks are pumped out
- Open and clean all drawers and lockers including Bilges
- Cushions should be turned on edge to allow air circulation
- Keep your boat as dry as possible. Purchase a No Damp from GLYS.
- Refrigerators should be cleaned and left propped open.

Please ensure that engines are accessible and hatches are not covered with items.

For shrink wrapping we will require your canvas down, which is offered as one of our services. However, it is each customer's responsibility to ensure their canvas and bars are disassembled and stored safely along with all fenders/holders and lines to allow our crews to work as efficiently as possible at this critical point in the year.
